

PORTER BUSINESS & OPERATIONAL PERFORMANCE

Comprehensive Analysis of Revenue Drivers, Order Dynamics,
Delivery Efficiency, and Strategic Optimization Opportunities

~Ankita Sarkar

Executive Summary.

TOTAL ORDERS

196,402

TOTAL REVENUE

₹52.75 Cr

AVG ORDER VALUE

₹2,685.61

ON-TIME DELIVERY

52.0%

Commercial Highlights

Revenue & Order Volume: Porter generated ₹52.75 Cr across 196.4K orders with a high AOV of ₹2,685. Markets 2 and 4 dominate total revenue contribution.

Late Night Dominance: 73% of orders (143.5K) occur during Late Night hours, making late-night fulfillment the primary revenue pillar.

Operational Bottlenecks

SLA Deficit: On-time delivery (<45 min) stands at only 52%, with an average fulfillment time of 47.5 minutes across markets.

Utilization Mismatch: Partner utilization bottoms out at 44% during mid-afternoon (14:00) while surging to 90% during evening peak hours.

Market Performance Breakdown

Order Volume by Market

Market Analysis

-  **Top Performers:** Market 2 (₹14.4 Cr revenue, 54.8K orders) and Market 4 (₹13.7 Cr revenue, 47.4K orders) drive over 53% of total revenue.
-  **AOV Uniformity:** Average Order Value remains highly consistent across all markets, ranging from ₹2,414 (Market 5) to ₹2,899 (Market 4).
-  **Growth Target:** Markets 5 and 6 represent underpenetrated territories (<10% order volume each) with significant expansion headroom.

Category & Demand Distribution

Top Categories by Revenue (₹)

Order Value Distribution

₹1K-2K: 33% (65.3K)
₹2K-3K: 24% (47.5K)
₹3K-5K: 22% (43.5K)
<₹1K: 11% (21.2K)
₹5K+: 10% (19.0K)

🍴 Fast-food staples (Pizza & American) generate over 20% of category revenue. 79% of all orders sit between ₹1,000 and ₹5,000.

Daily Demand Trends & Seasonality

Order Volume Across Days of Week

Weekend Surge

Order volumes peak significantly on **Saturday (34.4K)** and **Sunday (33.4K)**, reflecting a 44% surge over mid-week troughs (Tuesday: 23.9K).

Meal Period Concentrated

Late Night (143.6K orders) dominates overall volumes, followed by **Dinner (45.4K)**. Lunch and Morning contribute under 1% of total orders.

Delivery Time Distribution

⚠️ Delivery Bottlenecks

- ❌ **SLA Breach:** 48% of deliveries exceed 45 minutes, with nearly 39,000 orders taking over an hour to deliver.
- 📍 **Market Disparities:** Market 1 has the longest average delivery time at 51 minutes, compared to 46 minutes in Markets 2 and 5.

Hourly Demand & Partner Fleet Load

Hourly Order Distribution Peak

⚡ Peak Demand Hour: 2:00 AM (36,809 orders)

- 🌙 Demand surges dramatically from midnight through 3:00 AM, driven by late-night food ordering.
- ⚙️ Orders collapse to single-digits during early morning hours (11 orders at 7:00 AM).
- ⚙️ Afternoon demand gradually rebuilds starting from 14:00 (2:00 PM).

Partner Utilization by Market

👥 Utilization drops to a low of 44% at 14:00 before rebounding to 90% at 19:00-20:00.

Strategic Recommendations

1. Shift Fleet to Late Night

Reallocate driver supply schedules to match the massive 2:00 AM peak (36.8K orders). Introduce late-night driver incentives to boost fulfillment speed and reduce delay breaches.

2. Target Market 1 SLA

Market 1 exhibits the worst delivery times (51 min avg). Streamline merchant dispatch protocols and optimize routing algorithms specifically in Market 1 to elevate overall SLA.

3. Boost Mid-Day Demand

With utilization slumping to 44% at 14:00, launch targeted lunch & afternoon promotions to balance order load across non-peak daytime hours.
